The game was released for the Game Boy Color and Nintendo GameCube, as well as the PC and Sega Dreamcast. Gameplay The game features 5 different mini-games, including the game of Dino Trivia. Players guide the titular protagonist, a boy with a green jacket, on a gameboard of various scenes and objects from the film. The player then controls him by moving his character left or right on the board, to reach an island or island section where a large dinosaur is sitting. When a dinosaur stands, the player has to touch it with the cursor to enter it, before it slowly stands. When the dino is about to fall down, the player must hit it at the right time or it will destroy itself, similar to the way a real dinosaur does when it chases after its prey. When the player has defeated the dino, he or she is taken to another part of the gameboard, and is awarded a bonus if he or she has not been defeated at all. When a dinosaur is defeated, the player is able to inspect it, and is awarded a prize for finding hidden easter eggs. The easter eggs are hidden in the dinosaur's digestive system, where they were secreted during the dinosaur's digestion. They include a piece of chocolate, a heart, a note from Nick to Tim, etc. The dino can also be defeated in a manner similar to defeating a dinosaur in real life, as the game is timed to the real dinosaur's digestive system. Plot The game begins on June 10, 1999, where Nick is washing his hands in the river when the game begins. He and his friend Tim are at the Excelerator, where the "Great Dinosaur Chase" takes place. The game allows the player to participate in five scenarios from the movie, including the chase, the escape from the hurricane, the chase through the gardens, and finally the chase through the airport. The Great Dinosaur Chase consists of Tim and Nick being chased by a Tyrannosaurus rex. Reception Critical reviews Dino Defender III: The Game was met with negative to mixed reception upon release. GameRankings and Metacritic gave it a score of 41.55% and 42 out of 100 for the Game Boy Color version; 44% and 48 out of 100 for the GameCube version; 52.30% and 57 out of 100 for the Dreamcast version; 42.75% and 43 out of 100 for the PC version. 82157476af
